DID YOU KNOW THAT...

...NANOTECHNOLOGIES DEAL WITH MATERIALS THAT ARE THOUSANDS OF TIMES SMALLER THAN A HUMAN HAIR?

...NANOTECHNOLOGIES ARE ALREADY PART OF YOUR LIFE?

IN FACT, NANOTECHNOLOGIES ARE ALREADY USED IN EVERY DAY PRODUCTS.

NANOTECHNOLOGY IS SCIENCE AND ENGINEERING THAT INVOLVES THE STUDY AND APPLICATION OF EXTREMELY SMALL THINGS (MEASURED IN NANOMETERS).

Nanotechnology is in your toothpaste, sun cream, computer, clothes. It is even in your food. Nanostructures make your ice-cream taste better and your yogurt look whiter.

NANOTECHNOLOGIES WILL ALSO REVOLUTIONIZE YOUR FUTURE.

They can allow us to build lighter airplanes and bridges as well as to detect and possibly cure cancer and infections.

They can also provide techniques to purify water, helping us to reduce the shortage of drinkable water.

BUT ARE NANOTECHNOLOGIES SAFE?

Nanotechnologies have raised concerns on potential health risks, environmental hazards and wider social and ethical issues regarding their possible unforeseen long-term consequences.

WHY IS NANO2ALL IMPORTANT FOR YOU?

NANO2ALL will help you to better understand nanotechnologies and their applications. It will offer you **the opportunity to get involved in debates** to develop a citizenry knowledgeable about nanotechnologies.

We want to hear **your concerns** and **needs** and facilitate a dialogue together with scientists, businesses and governments to discuss the important issues which arise from the use of nanotechnologies.

NANO2ALL
GIVES YOU THE OPPORTUNITY TO:
