E-MRS 2019 SPRING MEETING - Exhibition Application Form

Acropolis Convention Centre, France – May 27 - 31, 2019

Exhibit: May 28 - 30

THE E-MRS IN BRIEF

Founded in 1983, the European Materials Research Society (E-MRS) now has more than 4,000 members from industry, government, academia and research laboratories, who meet regularly to debate on recent technological developments of functional materials. The E-MRS differs from many single-discipline professional societies by encouraging scientists, engineers and research managers to exchange information on an interdisciplinary platform, and by recognizing professional and technical excellence by promoting awards for achievement from student to senior scientist level.

As an adhering body of the International Union of Materials Research Societies (IUMRS), the E-MRS enjoys and benefits from very close relationships with other Materials Research organizations elsewhere in Europe and around the world.

Each year, E-MRS organizes, co-organizes, sponsors or co-sponsors numerous scientific events and meetings. The major society conference, the E-MRS Spring Meeting, is organized every year in May or June, and offers on average 30 topical symposia. It is widely recognized as being of the highest international significance and is the greatest of its kind in Europe with about 3,000 attendees every year.

Each symposium publishes its own proceedings that document the latest experimental and theoretical understanding of material growth and properties, the exploitation of new advanced processes, and the development of electronic devices that can benefit best from the outstanding physical properties of functional materials.

A unique audience

The 2019 E-MRS Exhibition will provide a unique opportunity to present innovative products and services of interest to the materials community.

SCIENTIFIC PROGRAM 2019

MATERIALS FOR ENERGY

- A Latest advances in solar fuels
- B Emerging photovoltaics: strategies for more stable devices
- C Batteries and supercapacitors: fundamentals, materials and devices
- D Advances in silicon-nanoelectronics, -nanostructures and high-efficiency Si-photovoltaics
- E Earth-abundant next generation materials for solar energy - III
- F Advanced materials, components & processes for integrated autonomous micro-power sources
- G Halide perovskites: low dimensions for devices
- H Materials for applications in photocatalysis and photoconversion
- I Recent developments in thermoelectric materials and applications
- J Nuclear materials

BIO- AND SOFT MATERIALS

- K Organic bioelectronics
- L New strategies for smart bio interfaces
- M Advanced carbon materials: electrochemical aspects

NANO-FUNCTIONAL MATERIALS

- N Nano-engineered coatings and thin films: from design to applications
- O Synthesis, processing and characterization of nanoscale multifunctional oxide films VII
- P Dielectric nanocomposites for energy, environment and health: from fundamental to devices
- Q Polar oxides: synthesis, science and applications
- R Smart materials for green buildings and vehicles: towards energy efficiency, energy utilization, and a healthy interior environment
- S ANIM 3: advances and enhanced functionalities of anion-controlled new inorganic materials

2 DIMENSIONAL MATERIALS

- T 2D semiconductors: applications and perspectives
- U Hybrid composites incorporating low dimension materials for sensors and clean energy applications

MATERIALS, ELECTRONICS AND PHOTONICS

- V Laser interactions with materials: from fundamentals to applications
- W Semiconductor nanostructures towards electronic and opto-electronic device applications - VII
- X Silicon carbide and related materials for energy saving applications

MODELLING AND CHARACTERIZATION

- Y Studying the materials chemistry in solution utilizing X-ray spectroscopic and scattering studies
 - Z Advanced quantitative transmission electron microscopy: materials research in several dimensions
 - AA Computations for materials – discovery, design and the role of data
 - BB Cultural heritage – science, materials and technologies

E-MRS 2019 SPRING MEETING EXHIBITION

Around 80 international exhibitors will display a full spectrum of equipment, instrumentation, products, software, publications and services.

To be held on **May 28 - 30 in the Acropolis Convention Centre of Nice**, the exhibit will be convenient to the technical session rooms and scheduled to coincide with the technical program. For exhibitors, it will mean an excellent opportunity to meet just the right customers and disseminate information effectively.

For meeting attendees, the E-MRS exhibition will offer the convenience of visiting with multiple vendors all under one roof. So, pick up some literature, enjoy a hands-on product demonstration or meet face-to-face with company representatives.

The following companies welcomed you at their booth in 2018:

2. ARRANGEMENT OF EXHIBITS

E-MRS reserves the right to determine final placement of the Exhibitor. Exhibitors agree to arrange their exhibits so as not to obstruct the general view of nor hide other exhibits. The booth decoration must be realized with non-inflammable or fireproofing materials. Exhibitors must use extreme caution when operating equipment which could cause eye damage, emit excessive radiation or in any way harm visitors in the exhibit area.

3. INSTALLATION

One half day for setting-up the booth, **Monday May 27 from 14:00 to 19:00**. Pick packages up to the Exhibition Hall. The arrangement of the booths has to be imperatively finished at this time, due to the constraints of the regular control done by the Safety Department of the Convention Centre. The storage of the empty boxes has to be planned with the Convention Centre.

It is forbidden to use nails, screws or glue on the structure. Any deterioration caused by the installations and decorations of any kind will be borne by the exhibitors.

The walls of the exhibition halls, pillars, stairs, doors and others shall not be used for purposes of decoration.

In addition to this, it is forbidden to: tamper with the waste heat, flues, water-pipes, compressed air ducts, electrical and phone circuits, water or drain network.

After unloading their equipment, the exhibitors are asked to park in the car park. The car park is managed solely and exclusively by the company Vinci Park. Parking in the technical grounds of ACROPOLIS CONVENTION CENTRE is strictly prohibited, except during unloading.

6. STORAGE

The Société d'Exploitation de l'Acropolis de Nice does not have any premises which can be used to store empty packaging during the expositions. The latter must therefore be immediately removed as set up progresses and, where necessary, brought back at time of dismantling.

The removal of disposable packaging (crates, boxes, etc...) and in the case of shell stands, the entire stand as well as the carpet and its adhesive are the exhibitor's responsibility. You can contact us for skips or containers in accordance with the volume required).

7. COLLECTION

Packages must be removed on dismantling day or 24 hours after the 1st dismantling day.

Take packages back down to the Delivery passage, bearing the haulier's sticker.

The Société d'Exploitation de l'Acropolis de Nice may not be held liable in any manner for the loss or destruction of any material left behind after the event. Nice Acropolis shall not pay any costs of acceptance, customs duties or other (carriage).

8. WASTE RECYCLING

The Société d'Exploitation de l'Acropolis de Nice remains at your disposal, throughout the exposition set up and dismantling period, for containers depending on the type of event in order to facilitate appropriate recycling of your waste.

Exhibitors who have products with the following pictograms: toxic products (paint, adhesives, solvents etc.) must use the containers (special wastes) provided for use with these. The skip location plan is available on site.

9. MAINTENANCE OF EXHIBITS

Cleaning services are reserved exclusively for the Société d'Exploitation de l'Acropolis de Nice which is in charge of cleaning the aisles and communal areas of the exhibition spaces. Exhibitors shall be responsible for daily stand cleaning.

10. PARKING

Parking around the Palais is strictly regulated. It is restricted to equipment unloading and loading, during set up and dismantling periods. It is prohibited during the event.

Light vehicles: There is a car park nearby (see detailed plan on page 17)

TRAVEL INFORMATION

Reaching Nice ...

BY ROAD

Nice is connected to all the great European cities by a major motorway network. In particular, the A8 motorway, 'La Provençale', running from Aix-en-Provence to the West to the Italian border on the East.

To reach the city centre:

The motorway provides direct access to the neighbourhood of your choice, with 5 exits:

- exit n° 50: Promenade des Anglais
- exit n° 51: Saint-Augustin
- exit n° 52: Saint-Isidore
- exit n° 54: Nice-Nord
- exit n° 55: Nice-Est

BY TRAIN

The SNCF (National Railway Company) provides regular connections from abroad and daily connections with the largest cities in France. The TGV (high-speed train) connects Paris and Nice in 5 1/2 hours. Direct daily connections. www.gares-sncf.com

BY AIR

The Nice Airport is an international gateway just 10 minutes from the city centre. The Nice Côte d'Azur Airport is the second largest in France with 13,3 million passengers travelling through each year, 111 direct-flight destinations and 61 scheduled airlines.

It is also the first airport outside Paris to offer a daily connection to New-York and Dubai and the leading provincial low-cost airport, with 3 million passengers a year and 18 airlines.

The infrastructures provided make it the second busiest airport in France, a secure, resolutely modern activity cluster, integrated in the Alpes-Maritimes's development and harmony. It has two terminals: T1 and T2. www.nice.aeroport.fr
