THE E-MRS IN BRIEF

Founded in 1983, the European Materials Research Society (E-MRS) now has more than 4,000 members from industry, government, academia and research laboratories, who meet regularly to debate on recent technological developments of functional materials. The E-MRS differs from many single-discipline professional societies by encouraging scientists, engineers and research managers to exchange information on an interdisciplinary platform, and by recognizing professional and technical excellence by promoting awards for achievement from student to senior scientist level.

As an adhering body of the International Union of Materials Research Societies (IUMRS), the E-MRS enjoys and benefits from very close relationships with other Materials Research organizations elsewhere in Europe and around the world.

Each year, E-MRS organizes, co-organizes, sponsors or co-sponsors numerous scientific events and meetings. The major society conference, the E-MRS Spring Meeting, is organized every year in May or June, and offers on average 30 topical symposia. It is widely recognized as being of the highest international significance and is the greatest of its kind in Europe with about 3,000 attendees every year.

Each symposium publishes its own proceedings that document the latest experimental and theoretical understanding of material growth and properties, the exploitation of new advanced processes, and the development of electronic devices that can benefit best from the outstanding physical properties of functional materials.

A unique audience

The 2016 E-MRS Exhibition will provide a unique opportunity to present innovative products and services of interest to the materials community.

TOP 12 AT THE SPRING MEETING IN 2015 - GEOGRAPHICAL ANALYSIS

The E-MRS Spring Meeting draws an audience from more than 60 countries. Representing quality and quantity, this audience comprises key decision-makers involved in the field of materials research.

SCIENTIFIC PROGRAM 2016

MATERIALS

- ☐ **A.** Hybrid materials: from the laboratory to the market
- ☐ **B.** Adaptive materials: devices and systems towards unconventional computing, sensing, bio-electronics and robotics
- ☐ **C.** Laser-material interactions for tailoring future applications
- ☐ **D.** Solid state ionics: defect interactions and their influence on ionic and electronic transport
- ☐ **E.** Substitution of critical raw materials: synthesis, characterization and processing of new advanced materials in optoelectronic and magnetic devices
- ☐ **F.** Advanced materials for printing
- ☐ **G.** Molecular systems for spintronics
- ☐ **H.** Tailored disorder - an advanced materials design for innovative photonic applications
- ☐ **I.** Functional oxynitride films for sustainable development
- ☐ **J.** Established and emerging nanocolloids: from synthesis & characterization to applications II

SEMICONDUCTORS

- ☐ **K.** Group IV semiconductors materials research - growth, characterization and applications to electronics and spintronics
- ☐ **L.** Wide bandgap materials for electron devices
- ☐ **M.** Silicon compatible materials and integrated devices for photonics and optical sensing
- ☐ **N.** Materials frontier for transparent advanced electronics II (E-MRS / MRS-J bilateral symposium)
- ☐ **O.** Group IV semiconductors at the nanoscale - towards applications in photonics, electronics and life sciences

BIOMATERIALS

- ☐ **P.** Carbon materials: surface chemistry and biomedical applications II
- ☐ **Q.** Smart biointerfaces for functional biomaterials
- ☐ **R.** Multifunctional nanostructures for diagnostic and therapeutic of diseases
- ☐ **S.** Biomimetic bioactive biomaterials – the next generation of implantable devices

ENERGY

- ☐ **T.** Advanced materials and characterization techniques for solar cells III
- ☐ **U.** Materials by design for energy applications
- ☐ **V.** Thin film chalcogenide photovoltaic materials
- ☐ **W.** Materials and systems for micro-energy harvesting and storage
- ☐ **X.** Functional materials for environmental sensors and energy systems

NANOMATERIALS

- ☐ **Y.** Graphene and related materials: from fundamental science to applications
- ☐ **Z.** Two dimensional crystals and van der Waals heterostructures for nanoelectronics
- ☐ **AA.** Solution processing and properties of functional oxide thin films and nanostructures II
- ☐ **BB.** Defect-induced effects in nanomaterials
- ☐ **CC.** In situ studies of functional nano materials at large scale facilities: from model systems to applications
- ☐ **DD.** Light interaction with nanomaterials
- ☐ **EE.** Carbon- or nitrogen-containing nanostructured thin films

WORKSHOPS & TUTORIALS

- ☐ **FF.** Sustainable knowledge and preservation of Cultural Heritage for future generations
- ☐ **GG.** Advanced materials and technologies for renewable energies (AMREN-2)
- ☐ **HH.** Function-assembly of nano-materials towards electronics, energy and biological applications (one day symposium)

E-MRS 2016 SPRING MEETING EXHIBITION

Around 80 international exhibitors will display a full spectrum of equipment, instrumentation, products, software, publications and services.

To be held on **May 3 – 5 in the Congress Center of Lille (Grand Palais)**, the exhibit will be convenient to the technical session rooms and scheduled to coincide with the technical program. For exhibitors, it will mean an excellent opportunity to meet just the right customers and disseminate information effectively.

For meeting attendees, the E-MRS exhibition will offer the convenience of visiting with multiple vendors all under one roof. So, pick up some literature, enjoy a hands-on product demonstration or meet face-to-face with company representatives.

The following companies welcomed you at their booth in 2015:

EXHIBITOR WORKSHOP

Free exhibitor workshops will be held each day from Tuesday morning to Thursday afternoon. The exhibitor workshops provide opportunities to get acquainted with the latest developments in equipment, media, and services available on the market. For meeting attendees, the exhibitor workshops will be an excellent opportunity to gain practical first-hand knowledge from experts in the field of materials

A limited number of exhibitor workshop time slots are available.

Workshops are located within the technical exhibition. Hours of operation are:

- ☐ Tuesday, May 3 from 9:00 am to 6 pm
- ☐ Wednesday, May 4 from 9:00 am to 6 pm
- ☐ Tuesday, May 5 from 9:00 am to 4 pm

Exhibitors who would like to present a workshop should contact E-MRS Hq at emrs@european-mrs.com

Guidelines

1. **First come – first served basis.** Please complete the table below
2. **30 minutes** free between each session to set up the room
3. The classroom is limited to 30 participants
4. Workshop host company is responsible for promoting its session
5. **Cost for organizing a workshop as exhibitor: FREE OF CHARGE (duration: 1 hour max.)**
6. The classroom (in theater style) includes:
 - LCD projector + Screen
 - Presidential table

2. ARRANGEMENT OF EXHIBITS

E-MRS reserves the right to determine final placement of the Exhibitor. Exhibitors agree to arrange their exhibits so as not to obstruct the general view of nor hide other exhibits. The booth decoration must be realized with non-inflammable or fireproofing materials. Exhibitors must use extreme caution when operating equipment which could cause eye damage, emit excessive radiation or in any way harm visitors in the exhibit area.

3. INSTALLATION

One half day for setting-up the booth, **Monday May 2 from 14:00 to 19:00**. Pick packages up to the Exhibition Hall. The arrangement of the booths have to be imperatively finished at this time, due to the constraints of the regular control done by the Safety Department of the Congress Center. The storage of the empty boxes has to be planned with the Congress Center.

It is forbidden to use nails, screws or glue on the structure. Any deterioration caused by the installations and decorations of any kind will be borne by the exhibitors.

The walls of the exhibition halls, pillars, stairs, doors and others shall not be used for purposes of decoration.
