

Biointerphases In Focus issue on Organic Bioelectronics

Manuscript Submission

INSTRUCTIONS FOR PREPARING BIOINTERPHASES MANUSCRIPTS

Papers presented at the E-MRS Workshop on Organic Bioelectronics are encouraged to be submitted for publication in the November/December 2017 issue of [Biointerphases](#). The papers will be peer reviewed.

[Click here for the Biointerphases Article Template for MS Word.](#)

Papers will be reviewed according to criteria set by *Biointerphases* and must meet *Biointerphases* standards for both technical content and written English. All manuscripts are reviewed to the same standards as regular *Biointerphases* submissions.

Submit your manuscripts to *Biointerphases* using the journal's online manuscript submission system, the *Biointerphases* Peer X-Press site:

<http://biointerphases.peerx-press.org>

In preparing your article, you should follow the instructions for contributors, which may be found on the Information for Contributors link at

<http://scitation.aip.org/content/avs/journal/bip/info/authors>.

Authors are encouraged to use the *Biointerphases* templates. The easiest way to prepare your manuscript is to use the available *Biointerphases* Article Template to delete and replace text as necessary. [Click here for the Biointerphases Template for MS Word](#). This file and the template used to create it are attached/available through your conference site/chair and at the site above.

Note that acceptance to present at the conference does not guarantee the acceptance of the manuscript. To be published in *Biointerphases*, the manuscript must:

- (1) present original findings, conclusions or analysis that have not been published previously by the authors or others,
- (2) be free of errors and ambiguities,
- (3) support conclusions with data and analysis,
- (4) be written clearly, and
- (5) have high impact in its field, which must be within the scope of topics covered by the journal.

Note: Authors should select “Article”, “Review”, or “Perspective” as the type of paper within the conference In Focus issue choice.

It is VERY IMPORTANT that authors indicate to which conference/special issue the paper is submitted.

Acceptable manuscript file types are MSWord, LaTeX, and PDF. For the initial submission/review process, a single PDF or MSWord file including the figures is sufficient. However, once a paper is accepted, MSWord or TeX file of the text, any tables and the list of figure captions along with the separate figure files will be required for final production. Use of color in Figures is free and encouraged.

Prepare illustrations in the final published size, not oversized or undersized.

For any other details about manuscript preparation, please refer to the *Biointerphases* (www.biointerphases.org) journal web page, Author tab, Information for Contributors.

<http://scitation.aip.org/content/avs/journal/bip/info/authors>

Manuscript deadline: July 30, 2017.

Note: Please observe the deadline to allow for timely processing. *Biointerphases* will try to include papers submitted after this deadline with the conference, but these papers may appear in a later issue.

SUBMIT MANUSCRIPT to: <http://biointerphases.peerx-press.org>
